PROFESSIONAL SUMMARY

Versatile Full-stack engineer who ships production WordPress platforms and custom plugins for healthcare, pharmacy, travel, e-commerce and restaurant businesses, backed by a MERN and AI-backend foundation. Built a telemedicine system with video consultations, a home-healthcare and lab-test booking plugin, and a travel-booking plugin suite on WooCommerce. Owns features end to end: data model, REST API, admin UI, payments, security hardening, and live deployment.

TECHNICAL SKILLS

WordPress	Custom plugins, WooCommerce (HPOS), Elementor Pro, CPTs & taxonomies, REST API, WP-CLI, WP-Cron, LiteSpeed Cache, Rank Math
Backend	PHP, MySQL, Node.js, Express.js, MongoDB, Mongoose, JWT, Bcrypt, Zod, Helmet, rate limiting
Frontend	JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, Material UI, Redux, Framer Motion
AI & Payments	LangChain, OpenAI API, Google GenAI, RAG, Agora RTC, SSLCommerz, Stripe, Clover, AWS S3, Backblaze B2
DevOps & Tools	Git, GitHub Actions & Releases, Hostinger, Cloudflare, Vercel, XAMPP, Swagger, Vitest, Supertest, Postman

PROFESSIONAL EXPERIENCE

Web Developer, WordPress & Plugin Development — **2026 – Present**

E-GUIDER | e-guider.com

- Build and maintain client sites on WordPress, Elementor and WooCommerce: **Meditaj**, **Meditaj Pharmacy**, **TravelZ**, **Axia** and **The Indian Tavern**.
- Develop custom PHP plugins with custom database tables, REST routes, role-based portals and admin dashboards, replacing page-builder layouts with faster, SEO-friendly native code.
- Integrate payments through WooCommerce (SSLCommerz Hosted Checkout, bank transfer, cash on delivery) and set up a Clover gateway; configure SMTP and WP-Cron email notifications.
- Cleaned a hacked travel site of spam and malicious code, hardened it, and migrated it to **travelz.com.bd** with URLs intact.
- Audit live sites for broken features and slow pages, restore product catalogs, and configure domain redirects (Namecheap, Cloudflare); plan work in phases with PM approval and local testing before release.

KEY PROJECTS

Meditaj / EG Care — Telemedicine Platform — meditaj.com | GitHub

PHP, WordPress, WooCommerce, REST API, Agora RTC, SSLCommerz

- Patient booking with specialty, availability and fee filters, instant MBBS doctor queue, family members and public doctor profiles; WebRTC video consultations, reviews and 30-minute email reminders.
- Patient, doctor and admin portals on seven custom tables with a metrics dashboard; building a prescription workflow where doctors write structured prescriptions and admins review and send them to patients in one click.

E-Care Health Services — Home Healthcare & Lab Test Plugin — Meditaj | GitHub

PHP, WordPress, WooCommerce, MySQL

- Caregiver booking, lab test orders and ambulance requests sharing one WooCommerce checkout and patient account with EG Care.
- Re-architected the lab module: division → district → area location master, per-provider test catalog, lab cart with configurable advance payment and coupons, and a live data migration.

TravelZ Holidays — Travel Booking Plugin — travelz.com.bd | GitHub

PHP, WordPress, WooCommerce, GitHub Actions

- Converted a React design into a native WordPress plugin: package post types, destination taxonomies, clean URLs, WooCommerce booking and PDF itineraries, shipped via GitHub releases with a built-in updater.

TravelZ Maldives & Visa Assistance — Plugins (co-built) — Maldives | Visa

- Maldives booking wizard with offline, bank transfer and SSLCommerz payments via WooCommerce orders; admin-managed visa plugin with fee tables, document checklists, PDF viewer, country search and Schema.org markup.

FocusTube — Full-Stack AI Learning Platform — Frontend | Backend | Live Demo

Next.js, TypeScript, Node.js, Express, MongoDB, LangChain, OpenAI, Backblaze B2, Stripe, Zod

- Turns passive YouTube watching into active learning with LangChain/OpenAI transcript summaries and RAG chat; Next.js frontend on a Node.js REST API with JWT auth, Stripe payments, B2 storage, Vitest/Supertest tests and Swagger docs.

Music Academy — Frontend · *Next.js, TypeScript, Tailwind CSS, Framer Motion* — GitHub | Live Demo

EDUCATION & LANGUAGES

B.Sc. in Computer Science and Engineering — Dhaka City College, National University — **2021 – 2025**

Languages: Bangla (native) · English (professional working) · Hindi (conversational)
